

## OUTDOOR BANNER INSTALLATIONS

Vinyl Banners displayed on a wall, stakes in the ground or between uprights should be anchored with bungee straps hooked through the corner grommets and angled back to the upright or fasteners on a wall. The use of bungees will keep the banner taut and also will allow “give” when the wind is blowing.

We have found that the black rubber bungees seem to work the best.

If high winds have ripped your grommets out of the banner, we suggest that you purchase tarp clamps from a hardware store or home center. Fold a hem on the ends of the banner and install the tarp clamps on each corner and re-attach the bungees straps.

***Peoria Flag & Decorating Co. does not warrant any banners; they are intended for short term applications, not permanent installations.***
